## <About the Chatbot>

- The Chatbot is an automated response system using AI (Artificial Intelligence). It is not a human conversation.
   If the Chatbot does not understand your question, please rephrase and try again.
- The Chatbot is available 24/7, but it may pause unexpectedly due to technical issues.
- The Chatbot does not handle personal queries (such as, whether or not you are eligible for unemployment benefits). Therefore, do not enter your personal information.
- The Chatbot focuses on frequently asked questions, not all topics.
- Responses may use simplified terms, instead of technical ones.
- To improve the accuracy of responses, the Chatbot may record the user's conversation history (answers & questions) within necessary limits.
